

Autumn 2024

# Selekt DSM: Classic Hub (Late-2024 Model)

The Modern Classic

INTERNAL USE ONLY

**Selekt DSM: Classic Hub (2024-)** enhances the overall quality of the Selekt DSM range, whilst maintaining the same cartridge-based modularity and compatibility as its predecessor. This new Classic Hub has been beautifully honed by our product design team to ensure that it looks and feels premium from every angle.

With new features, improved metalwork and chassis design, new Selekt DSM: Classic Hub is the modern classic.

Classic Hub has been rejuvenated with a touch of class to make it a highly desirable product to behold and interact with. Smart buttons are steel, the large-format display extends along the front fascia, its feet are stainless-steel, and the Linn logo is UV-printed on the chassis sleeve for a sharp finish.

The chassis itself is a rigid design, with clean edges and chamfered transitions for an elegant and luxurious appearance.

## Key points

As previous generation Selekt DSM: Classic Hub (2018-2024), plus:

- Integrated headphone amp with 1/4" jack output
- RCA outputs for bass reinforcement from a subwoofer
- Available in silver finish for the first time
- Improved chassis metalwork
- Stainless-steel smart buttons
- AirPlay 2-compatible
- Added 24bit/384kHz and DSD256 compatibility
